** Daily Value is not established.

*** Pycnogenol® is the registered trademark of Horphag Research, Ltd., and is protected by US Patent #5,720,956, 6,372,266 and pending applications and international patents.

Other ingredients: Fructose, glucose, citric acid, maltodextrin, silica, calcium sulfate and pectin.

What Makes This Product Effective & Unique?

nutraMetrix OPC-3 is an isotonic-capable supplement with a potent combination of grape seed, pine bark, red wine, bilberry and citrus extract bioflavonoids, all found to be highly effective antioxidants. OPCs (oligomeric proanthocyanidins) are complex organic plant compounds, known as bioflavonoids. These bioflavonoids are found in colorful fruits, vegetables and certain tree barks that provide exceptional and broad nutritional benefits to the human body.

Research has shown OPCs to be up to 20 times more powerful than vitamin C and 50 times more powerful than vitamin E in neutralizing free radicals. nutraMetrix OPC-3 contains the only isotonic form of Pycnogenol® in the world. Pycnogenol, a natural plant extract from the bark of the French maritime pine tree, is the most researched bioflavonoid on the market.

What are antioxidants?

Antioxidants neutralize harmful free radicals. Free radicals are unstable molecules or compounds that can damage your own cells, cell membranes and even DNA. Antioxidant nutrients such as OPCs, vitamins and minerals are capable of counteracting the damage caused by excessive free radicals. Specifically, antioxidants can stabilize free radicals before it has a chance in causing cell damage (known as oxidative stress) or prevent other molecules from generating into unstable free radicals.

Is nutraMetrix OPC-3 safe?

Yes. OPCs are among the most valuable constituents of a healthy human diet. OPCs have been researched and used for over 30 years throughout Europe. Extensive safety studies and lab testing reveals no evidence for human toxicity or allergic reactions. OPC-3 contains pure OPCs and additional bioflavonoids. Balanced quantities of potassium and fructose/glucose are added to allow OPC-3 to become isotonic when mixed with water as directed on the label. OPC-3 is free of harmful chemicals, preservatives and alcohol. OPC-3 should be taken as directed on the label or by your health professional.

What is the advantage of taking nutraMetrix OPC-3 regularly?

Many effects of OPC-3 start to work after a single serving. Additional effects of OPCs may take days or weeks for complete benefits. Taking nutraMetrix OPC-3 daily enables the body to sustain a consistent antioxidant defense, promote cardiovascular health and many more benefits.
